In this issue, published articles consist of two reviews in emergency medicine and intensive care, original articles in intensive care, internal medicine, general surgery, emergency medicine, infectious diseases, radiology and psychiatry. We hope that the reviews and original articles in this issue will make significant contributions to researchers and literature. The number of citations and impact factor of Comprehensive Medicine, which constantly renews itself scientifically and technically, is increasing regularly. Please always consider Comprehensive as your own journal, submit your evidence based articles to the journal, do a timely and rigorous process as a reviewer, read the articles published in the journal and quote the articles of the journal.
