
2021 Subject Index

AHP	110	Four-stroke diesel engine.....	177
Air pollution	22	Functional resonance analysis method	102
Ammonium nitrate.....	130	Fuzzy AHP	51
Artificial neural networks	13	Fuzzy logic.....	22, 210
Bayesian network	130	Hazardous materials transportation	130
Blue voyage.....	120	HP profile.....	200
Bodrum gulet.....	120	Hull form.....	120
Bulk Cargo.....	51	Human reliability	102
Cargo performance.....	222	Ikeda's method.....	283
Company generation	243	Institutional theory.....	138
Competitive advantage	3	Institutionalization level.....	243
Computational fluid dynamics	192, 266	Investment analysis	233
Container	13	Knowledge management	222
Container ship.....	233	Lumped-mass method.....	274
Container shipping.....	3	Marine propulsion shaft system.....	274
COPRAS	168	Marine structures	74
Corporate governance	243	Marine tourism	157
Coupled torsional-longitudinal vibrations.....	274	Maritime	256
Customer satisfaction	157	Maritime accident.....	31, 102
Customer-to-customer interaction	157	Maritime business	222
Cylinder pressure.....	177	Maritime commerce.....	13
Dangerous good.....	130	Maritime education.....	64
DARPA.....	192	Maritime family businesses.....	243
Derived motions	283	Maritime industry.....	1
Digital transformation	3	Maritime logistics	233
Digitalization.....	3	Maritime Organizations	138
Distance online education.....	64	Maritime pilotage.....	154
Draught survey.....	51	Maritime safety	31
Economic policy uncertainty	66	MCDM.....	168
Education.....	256	Multicriteria decision making	41
Engine performance parameters	177	Navigational performance	222
Engine room fire.....	210	Organizational commitment	256
Engineering economics	233	Oscillating water column.....	266
Event tree	210	Panel causality.....	66
Exhaust backpressure.....	177	Paris memorandum of understanding.....	85
Exhaust emissions	177	Picture fuzzy sets	233
Family-Owned Businesses	138	Polar Code.....	31
Finite element analysis.....	200	Polar regions.....	31
Flag performance.....	85	Port pilotage.....	154
Forced vibrations	274	Port state control	85

2021 Subject Index

Port sustainability	41	Shipyard location	168
Port throughput.....	66	Simonline solution.....	64
Power distance.....	256	Situational awareness.....	154
Probabilistic seismic hazard assessment	74	Spherical fuzzy safety and critical effect analysis	110
Regular waves.....	266	Strait of Istanbul.....	22
Renewable energy	266	Strategies.....	22
Resistance	192	Submarine.....	192
Resource-based view	3	Sustainability performance measurement	41
Risk analysis.....	210	SWARA.....	168
Risk assessment	110, 130	Tasai's method.....	283
Round stern	120	Techno-nautical services	154
Safety-II	102	The COVID-19 pandemic	1
Sea ice change.....	31	The level of institutionalization.....	138
Seafarers as the key workers	1	The LIFO model	138
Seakeeping code	283	Time series	13
Self-propulsion estimation	192	TP profile.....	200
Service quality.....	157	Transom stern	120
Services marketing.....	157	Turkey.....	13
Ship construction.....	200	Turkish	138
Ship management	222, 243	Uniform hazard spectra	74
Ship performance	222	VIKOR.....	110
Ship strength.....	200	Vocational training	256
Ship-to-ship collision.....	102	Volume of fluid	266
Shipping Business.....	138	Yacht and boat industry	168
Shipyard accidents	110
